UNFSS PRE-SUMMIT AFFILIATED SESSION

July 26 2021 (13:30–14:20 RomeTime (CEST)

Mobile Pastoralism Valuing Rangeland Variability:

A GAME-CHANGING IDEA FOR SUSTAINABLE CONSUMPTION & PRODUCTION FROM THE LIVESTOCK SECTOR

Come join us to learn why the UNFSS needs to adopt a global initiative for mobile pastoralism valuing rangeland variability & vote for it!

A highly variable natural environment is now increasingly understood as the norm. Mobile pastoral systems provide lessons for producing food by working with a variable nature. These systems are operated by about half a billion people today, who are users and stewards of rangelands that cover an estimated 54% of the world's land surface. Conversion of these ecosystems to forest or cropland is unsustainable and misguided.

Movement of livestock (mobility) through rangelands maintains ecological processes and sustains production. High-value protein offered by nature-based livestock products improves the nutrition of the vast majority of people in the world. If pastoral systems are to take their sustainable strategies into the future, a fundamental change in attitudes, perceptions and policies is needed. Many governments are

moving in this direction, and pastoralists continue to innovate to ensure sustainable production and consumption.

This parallel session will increase understanding of the world's rangelands and pastoralists for sustainability and achievement of the SDGs. It will bring the voices of pastoralists from around the globe to the UNFSS and call on it to adopt a game-changing global initiative that values mobile pastoralism and rangeland variability.

Welcome & Opening Addresses:

Antonio Rota Lead Tech. Adv.- Livestock Dev., IFAD

Jonathan Davies Global Drylands Coordinator, IUCN

Speakers:

Carlos Martorell

Professor, National Autonomous University of Mexico

lan Scoones

Institute of Development Studies, UK

llse Koehler-Rollefson

Camel Charisma Pvt. Ltd, India

Damdindorj Batmunkh

Director General,

Policy and Coordination for Livestock Husbandry, Ministry

of Food, Agriculture, and Light Industry, Mongolia

Fiona Flintan

Senior Researcher,

Hijaba Ykhanbai

Director,

Environment and Development Association, JASIL, Mongolia

Pablo Manzano University of Helsinki, Finland

Concha Salguero

Coordinator of Projects,

Transhumancia y Naturaleza, Spain

Moderator

Jürgen Hoth

Vice President, FUNBA, Mexico

Engin Yılmaz

Director,

Yolda Initiative

Ken Otieno Director, Resource Conflict Institute (RECONCILE), Kenya

Sarah Frazee

Meat Naturally Pty, South Africa

Igshaan Samuels

Rangeland Ecologist, Agricultural Research Council, South Africa

COME JOIN US TO LEARN WHY THE UNFSS NEEDS TO ADOPT A GLOBAL INITIATIVE FOR MOBILE PASTORALISM VALUING RANGELAND VARIABILITY & VOTE FOR IT!
